

NEWBURY VET CLINIC

Presentation By: Matthew Sargent

INTRODUCTION

Back in September of 2019, I started the internship program and had absolutely no idea where to go. I wanted to do something in the field of health science but cottage hospital reached its maximum capacity of students. There was nothing much left to choose in the Woodville area and I didn't know what to do. I always have liked animals since I was a kid so I decided to see if I could intern at the Newbury Vet Clinic, sure enough one phone call away and I was ready to start.

ABOUT NVC (NEWBURY VET CLINIC)

Newbury Vet Clinic was converted into a clinic out of an old farmhouse that was remodeled for veterinary care. It is located on a beautiful piece of land with a gorgeous overlooking view of the Vermont mountains. On the inside there is the main lobby that is where you wait for your appointments and the pharmacy is located out back. The laboratory and surgical units are on and main floor they have modern blood analyzers, X-ray machines and more. In the lower level is rooms for the dogs that are boarding for day or night.

MY EXPERIENCE

I will never forget my time interning at the clinic, I learned and saw so many new things like:

- Learning Medicines
- Observing Surgeries, Appointments, and Neutering
- Blood Drawing
- Different Types of Cats and Dogs
- Stocking Inventory
- Cleaning Exam Rooms, Kennels, Office Spaces

THE STAFF

I really enjoyed the staff members company over at the clinic. We all got along well in a professional and friendly manner. When it was my last day there and my 120 hours were logged I was a bit sad to leave but I was fortunate for the experience.

CONCLUSION

To wrap it all up I am very grateful to have this experience in my high school journey. I may consider going into veterinary science after this experience at the clinic.

I am also glad to say that after a week of leaving NVC, I received a phone call from the Office Manager and I was offered a part time job. I gladly took that offer and am now officially part of the team at Newbury Vet Clinic.
