

MARINE SCIENCE SCIENCE FELLOWSHIP

FOR HIGH SCHOOL STUDENTS

Spring Semester: February-June 2024

Join us for a semester-long marine science field and research learning opportunity that goes far beyond the classroom!

This indepth introduction to the marine sciences includes hands-on field investigations, scientific inquiry skills and practices, and conversations with local scientists, conservationists, and other career professionals in the marine sciences fields.

As a Marine Science Fellow, you will:

- Create your own research project with the guidance of a mentor.
- Have the opportunity to participate for one or two semesters; the second semester will allow you to explore marine science topics in greater depth and expand your research project.
- Learn how to create and present a poster of your research findings.
- Have the opportunity to earn credit through your school.
